
Serv-U 15.1.5 Release Notes

Last updated: 2/7/17

These release notes describe the new features, improvements, and fixed issues in Serv-U 15.1.5. They also provide information about upgrades and describe workarounds for known issues.

Important:

- NPAPI is now deprecated in Google Chrome. This means Web Client Pro will not function in Google Chrome. As a workaround, access Web Client Pro using another browser.

New features and improvements

Serv-U v15.1.5 is a service release containing security fixes, described in the [Fixed Issues](#) section.

Serv-U v15.1.4 was a service release containing two hotfixes, described in the [Fixed Issues](#) section.

Serv-U v15.1.3 was a service release containing two hotfixes, described in the [Fixed Issues](#) section.

Serv-U v15.1.2 included the following new features and improvements:

- **Improved SMTP configuration experience**
When setting up an SMTP server, it is now possible to send test emails to verify the SMTP configuration.
- **Security improvements**
Serv-U now supports TLS 1.1 and 1.2, and also supports 15 new cipher suites.
- **Redesigned Mobile Web Client and other design enhancements**
The Mobile Web Client now comes in enhanced design, matching the general look and feel of Serv-U.
- **Updated default web client settings**
It is now possible to set up Web Client Pro as the default web client.
- **Enhanced event management**
New Serv-U event providing the option to get a notification when a file is moved automatically by the server.
